

Conference Profile

AEROTECH VI conference is a platform for academia, government agencies and industries to share current status in aerospace technologies, expand professional networking, and also offer possible collaborations for technology advancement. The conference has now entered into its sixth edition since its inception in 2005, and this time it will be held in Kuala Lumpur, the national capital city of Malaysia. The conference program includes keynote lectures, invited lectures and technical presentations in the specialised areas of aerospace engineering.
